

Featuring VisionMax Control Technology

The VisionMax touchpad is designed for quick setup and diagnostics.

Red LED Indicates: Good signal input from ATM.

Green LED Indicates: Monitor healthy, lamp half life, and end of warranty.

Innovative Design

InVision has taken a new approach to LCD display design. Our displays feature a drop in monitor replacement for either NCR or Diebold ATMs. An innovative yet simple mounting system insures a fast and problem free installation. Our LCD displays are available in both standard bright and sunlight viewable models, some with touch screen capability. All required cables, gasket material, vandal glass, and light sensors, are included.

Vandal Glass

Knowing that your ATM is no longer just a cash dispenser, we have selected a superior vandal glass that enhances the picture quality for sharper images, while still providing the security we have grown to trust.

Warranty

InVision offers a full 1 year run time warranty or 18 months from date of purchase. See warranty statement for details.

Availability

We know that our customers need product fast, so we are committed to having our most popular displays stocked so that we can fill orders within 2 business days. See the reverse side for more information on our wide range of applications.
